

Union of Concerned Scientists

+

- can assign value to level of urgency
- raise awareness, teaching
- tool for exposure
→ actual upward mobility

- bringing (+) to all stakeholders
Representation
- access to resources
languages vocabulary (accessibility) (\$) (circled)
- direct power over research
+ applications
- recognize ^{HARMFUL} effects of academia
+ misguided teachings
(knowledge = source/driver of change)
- acknowledge positionality inherent in
"objectivity" → is it really tho"
→ + money ←
- + collaboration
- CONSENT
- it shouldn't have a final say (arbitrary)

Refuse Research

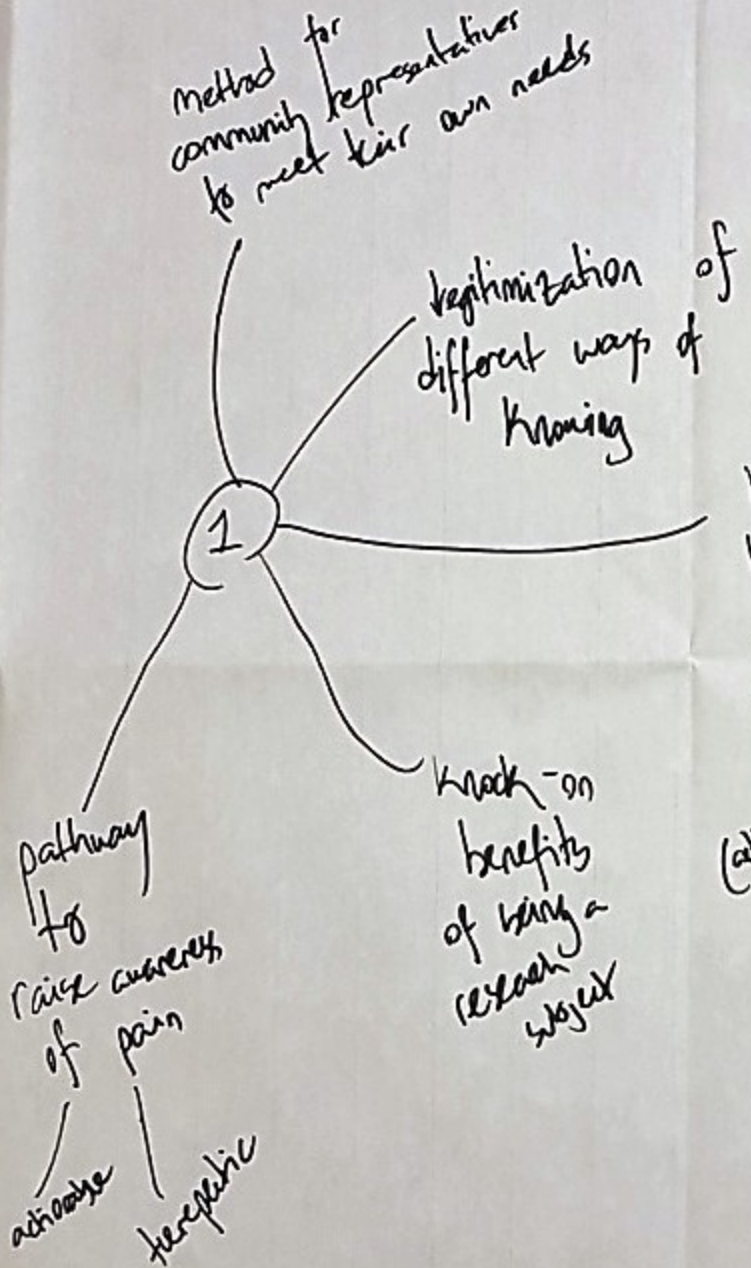

① "Epistemic Violence."

Questions "valid" knowledge / knower
+ Uses pain of subjects and researchers advocate on that pain

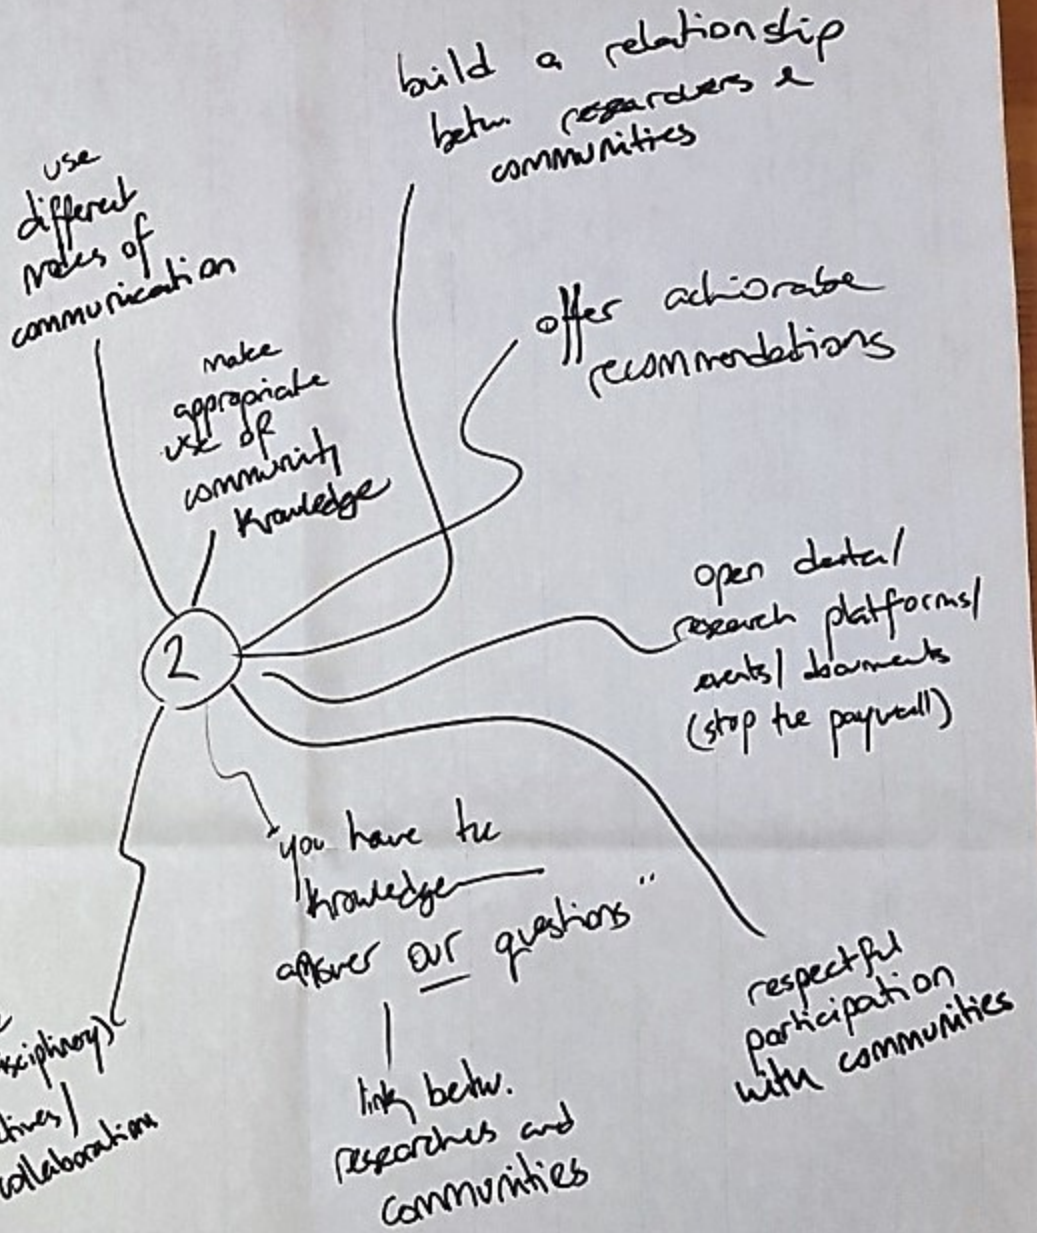

Circle jerk

② → Not being seeing as "passive" subject that need to be fixed
and rather an active stakeholder.

→ Using academic mapping to map success rather than focusing on the pain of settler colonialism.
→ Community based projects that use Academia as a tool for self-determination rather than them being used by academia for its own narrative.

has the power to criticize powerful systems that might otherwise be immune to (at least) criticism

Other Things:

- not results are not published
- who benefits from research? who funds it?
